This assignment is a continuation of the previous assignment.

After user got this email of password the users can use the URL to login their account.

This homework totally revised 6 main documents on the basis of the previous one, each of them are:

1. Moviesdetalis.php

After users login the system, they will see the movies they can search, and the details of the movie, like name, cover picture, country etc.

2. Addmovie.php and admin_addmovies.php

This documents allow admin to add movies of the system and use this page to add movie.

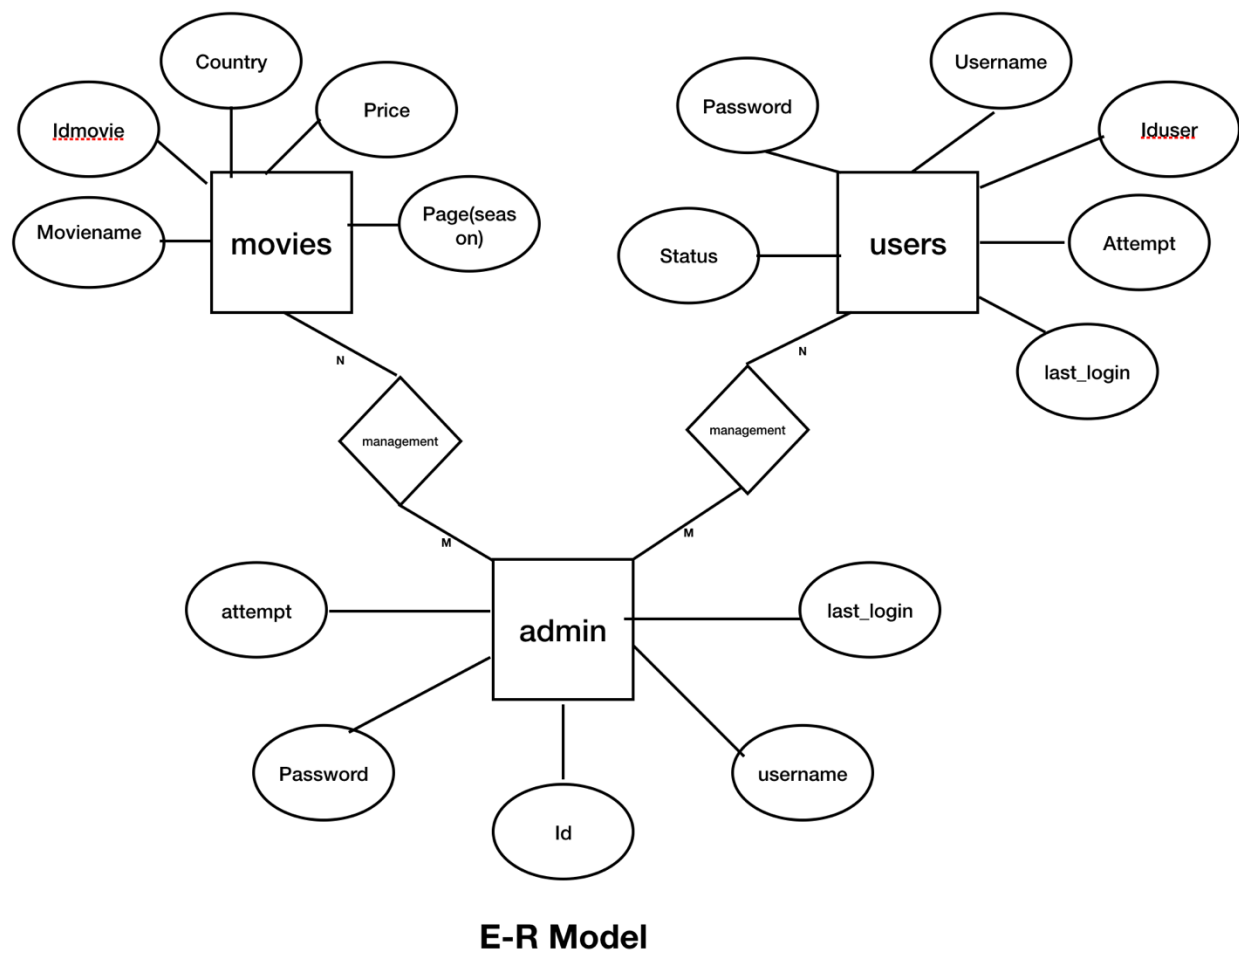

3. Deletemovie.php and admin_deletemovie.php

This documents allow admin to delete movies of the system.

4. Showallmovie.php

This documents will shows the movies details like name, country etc. after admin delete one or more movies. It will looks like a control panel of the content.

The overall database idea:

Allows admin and users check the movies from the mysql database of the website.
